SPEAKER BIOGRAPHY

Molly Welch is the founder of IRS-approved, 501(c)3 non-profit organization, "A Second Later", and survivor of a horrific automobile accident that occurred in 2008 and left her with a traumatic brain injury. The life-changing event was all due to distracted driving. It was winter her junior year and Molly was a promising journalism student. Excited about her latest reporting assignment, Molly briefly looked down to hit the play button on her device. "A second later" she hit a pick up truck and wound up in a coma. She suffered a TBI that left her paralyzed on her right side.

EVENT DESCRIPTION

Molly's crusade is to get her message out to all motor vehicle operators that distracted driving isn't worth the risk.

She is available for speaking engagements throughout the year with a particular passion for reaching out to high school students and young business professionals. She is currently working with an Alpharetta company called NuTEQ Solutions that can provide drivers with voice texting capabilities. They have partnered with Molly because they share her goal of preventing distracted driving. "I need to be able to share my story of tragedy and triumph with as many people as I can so that they won't make the same mistake," pleads Molly. "Thanks in advance for helping find a solution to this extremely vital problem!"
